

Environmental Policy Statement

October 2009

This statement outlines Fine Print policy in relation to managing our environmental performance.

Fine Print has developed an environmental management system to meet the requirements of the internationally recognised standard ISO 14001. Our compliance with this standard is verified by a UKAS accredited certification body. We commit to continually improve and maintain our certification to ISO 14001 by regular monitoring and review of our environmental performance.

Fine Print shall minimise the impact on the environment caused by our activities that we undertake as part of our business. We commit to do this by:

- Improving staff environmental awareness and understanding
- Complying with or exceeding applicable legal and other requirements to which the company subscribes which relate to our environmental aspects.
- Managing a continual improvement programme regarding the efficiency of the overall printing process to reduce wastage
- Promoting environmentally responsible purchasing
- Maximising energy efficiency by identifying, analysing and implementing opportunities for improvement
- Improving the environmental efficiency of our transport and distribution
- Investigating the feasibility of managing a print waste recycling programme with our clients
- Reviewing our environmental policy regularly

Our aims and commitment to our environmental management system are endorsed by all employees within the company and led by our Managing Director.

Dan Bakewell – Managing Director
